

Hopkin DJ Systems

Price list

Package	Price	Included
1. DJ Cable & Connection Call-Out	£95	A focused service visit for a small DJ system issue, such as reconnecting a mixer, replacing signal leads or resolving a basic playback connection problem. • Single-system connection check • Mixer or controller reconnection • Basic audio signal test • Practical setup advice
2. Home DJ Desk Setup	£375	A tidy installation for a bedroom, study or small home DJ corner using a controller or compact decks with powered speakers. • DJ desk equipment placement • Controller or deck connections • Powered speaker setup • Playback and level testing
3. Home Performance System	£950	A fuller home setup for regular mixing, including a mixer, decks or controller, monitor speakers and a dedicated listening layout. • Multi-unit DJ equipment connection • Monitor speaker positioning • Audio and power cable management • Input, output and headphone testing
4. Small Party DJ Rig	£2,250	A compact event-ready installation for a lounge, function room or private party space, combining DJ control equipment with main speakers and a subwoofer. • DJ controller or deck system • Main speaker and subwoofer connection • Mixer and playback source setup • Room-level sound check
5. Venue DJ Booth Installation	£3,250	A dedicated DJ booth setup for a small bar, club room or hospitality venue, with equipment arranged for repeat use and straightforward staff operation. • Fixed DJ booth equipment layout • Decks, mixer and monitor integration • Main sound system signal routing • Neat accessible cable runs
6. Event Room Sound Package	£4,750	A larger installation for function rooms and event spaces needing a complete DJ position, distributed speakers and controlled audio coverage. • Full DJ position installation • Main speakers and subwoofer system • Secondary speaker connections • System balancing and handover

Package	Price	Included
7. Club Room DJ Sound System	£7,200	A substantial DJ sound installation for a busy club room or entertainment venue, covering the booth, monitoring, main outputs and bass reinforcement. • Professional booth signal layout • Multi-speaker main sound system • Dedicated DJ monitor output • Subwoofer and crossover setup
8. Multi-Room Hospitality DJ System	£9,800	A coordinated DJ and audio installation for a larger hospitality site with separate event, lounge or bar areas requiring planned signal distribution and independent volume control. • Central DJ source and mixer setup • Audio distribution between rooms • Zone speaker and volume connections • Room-by-room testing and handover
9. Whole-Building Entertainment Installation	£13,500	A large commercial DJ and sound installation for a whole venue, combining a main DJ booth with multiple audio zones, event spaces and supporting speaker systems. • Whole-building audio system layout • Commercial DJ booth installation • Multiple-zone speaker distribution • Complete system testing and operator handover
